One of the new features is the ability to create a **Company structure** with a heirarchical tree of accounts.

It is possible to create sub-accounts connected to the main account.

You can also create sub-accounts of sub-accounts and so on.

License Usage statistics show how many licenses there are on an account and how many of those are actually in use.

Results can be presented in charts or downloaded as an Excel report.

Reports can be configured by license type or date Range.

Under the **Users tab** you will see a list of members of the account as well as which account(s) or sub-account(s) they belong to.

It is possible to filter by Name, Email, Account or Status.

Select **View** to see more details or **Edit** to edit member details.

Before adding your licenses it is possible to configure a time period for how long you would like to use the license(s) on that device.

Different license options can be set with different time periods.
